Summary

Computer Science undergraduate building AI-powered full-stack applications using modern web technologies and Large Language Models (LLMs). Passionate about developing scalable software solutions while strengthening software engineering and AI fundamentals.

Education

University of Engineering and Management, Kolkata

2024 – 2028

Bachelor of Technology (B.Tech.) in Computer Science and Engineering

CGPA: 8.4/10

Technical Skills

Languages: Python, Java, JavaScript

Frontend: HTML5, CSS3, React, Tailwind CSS

Backend: FastAPI, Node.js, Firebase

AI: Large Language Models (LLMs), OpenAI API, Prompt Engineering, Scikit-learn

Developer Tools: Git, GitHub, VS Code, Vercel, Render

Projects

HEALTHBIRCH — AI-Powered Telemedicine Platform

- Built an AI-assisted telemedicine platform using React, FastAPI, and Firebase to improve access to digital healthcare services.
- Integrated Large Language Models (LLMs) to provide intelligent symptom guidance and healthcare assistance.
- Designed responsive and user-friendly interfaces with secure authentication and cloud-based data management.
- Deployed the application using Vercel and Render while optimizing performance and usability.

Certifications

- Deloitte Australia – Data Analytics Job Simulation (Forage)
- Introduction to Generative AI (Google Cloud Skills Boost)
- Google Cloud Fundamentals: Core Infrastructure
- Build Serverless Applications (Microsoft)
